

Home banking will no longer support browsers using compromised security protocols such as SSLv3, TLS 1.0, TLS 1.1.

To access Home Banking, members may need **to enable** TLS 1.2 on their Internet Explorer browser. To enable this feature, to go: ***IE Main Menu > select Tools > Internet Options > select the Advanced tab > in the Security category, check Use TLS 1.2 > click OK > exit and restart IE.***

The following are common browsers, the version of those browsers that support TLS 1.2 and a link to download the latest version of that browser:

- **Internet Explorer**
 - IE 11 supports TLS 1.2 (IE 8-10 supports TLS 1.2, but are disabled by default)
 - <http://windows.microsoft.com/en-us/internet-explorer/download-ie>
- **Mozilla Firefox**
 - Version 27 and newer supports TLS 1.2
 - <https://www.mozilla.org/en-US/firefox/new>
- **Google Chrome**
 - Version 30 and newer supports TLS 1.2
 - <https://www.google.com/chrome/browser/desktop>
- **Apple Safari**
 - Version 7 and newer supports TLS 1.2
 - <https://support.apple.com/downloads/safari>
